Our Experience |

Agenda

Revolut

1. Orientation & Overview
2. Diagnostics
3. Intervention
4. Evaluation & Recommendation
5. Implementation

Orientation & Overview

Revolut

1.1 Company Overview & Business Model

Mission and Vision

Build the leading financial super app to deliver a unified, borderless money experience

Customer Value Proposition

- Revolut is a global digital financial "super app" serving retail and business customers.
- Unified access for accounts, cards, payments, foreign exchange, savings, and business tools

Operating Model

- Scalable, modular platform enabling rapid feature launches
- Banking partnerships
- Engages in inclusive finance by operating under the freemium model.

Revenue Model

- Tiered subscriptions (retail, business, and investment grades)
- Interchange, FX & transfer fees
- Trading & ancillary services
- Interest Income
- Business & Merchant Services

Strategic Advantage

Outside-in & Emergent category
Leverages innovation, experimentation, and Blue Ocean Strategy

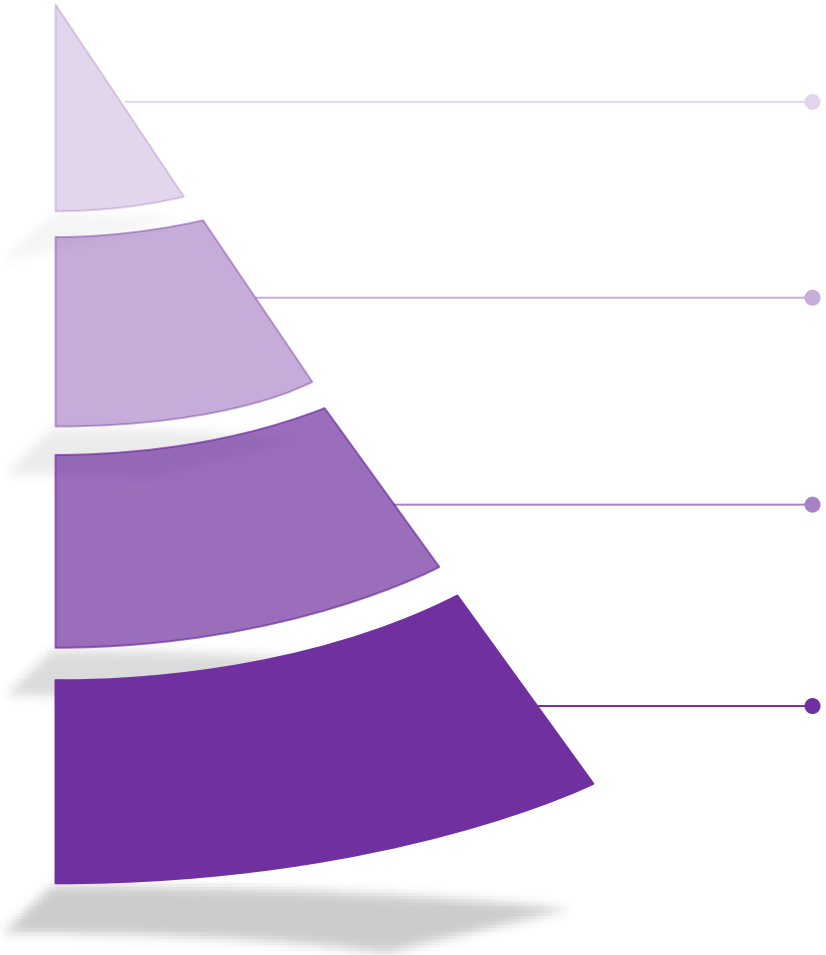
Revolut

1.2 Key Strategic Issues



Regulatory and Compliance Challenges

- **Faces delays in UK banking license approval** and increased FCA scrutiny
- **Multi-jurisdiction operations raise compliance costs** and slow product rollout

Reputation and Cybersecurity Risk

- Past **service issues** and digital-only model **weaken customer trust.**
- High **exposure to fraud** and **hacking** demands strong cybersecurity.

Market Competition

- **Competes** with traditional banks' scale and rivals like **Monzo, N26, and Wise**.
- Needs to **balance rapid innovation with efficiency** and reliability.

Customer Support and Innovation

- Users expect **fast**, **low-cost**, and global **financial services.**
- Must **innovate** while **meeting demand** for **secure**, ethical, and sustainable **products**.

2.1 PESTEL | Macro – Environmental Overview

PESTEL Factor	Political	Economic	Social	Technological	Environmental	Legal
Industry Positives	Digital Operation Resilience Act (DORA) will improve digital security across the industry.	ECB projects stable growth until 2027 and through to 2023, along with a declining inflation rate.	Digital banking adoption trends are positive. Market is projected to grow from $10.14B (2025) to $35.36B (2033) ~ CAGR of 16.9%	ML and Gen AI will improve cybersecurity through enhanced pattern recognition which will help predict fraud before it occurs.	Consumers willing to pay up to 9.7% more for sustainable goods/services EU investors seeking greener portfolios.	Payment Services Directive & Payment Services Regulation (PSD3) and Markets in Crypto Assets (MiCA) regulation to enhance digital safety.
Industry Negatives	Increased resource expenditure to be compliant with new EU regulations.	Current trade tension might have rippling effects on the fintech industry.	UK's Authorised Push Payment (APP) fraud regulation makes payment service providers liable to reimburse clients up to £85,000.	Poor AI implementation can raise concerns in relation to data privacy and security.	Poor ESG reporting or greenwashing accusations can have negative implications for firm reputation.	EU approval required to sell crypto assets. Elevated operational hurdles and associated compliance costs.
Impact on Revolut	Moderate threat in the short-term Long-term opportunity to demonstrate commitment to data security.	Low-level threat due to stable economic forecasts in the EU and UK.	Moderate regulatory threat in the UK Heightened opportunities due to positive adoption rates.	Significant opportunities to improve cybersecurity practices.	High-degree of opportunities to differentiate in relation to sustainable finance.	Medium-level threat Investments in regulatory consultants might be required.

2.2 PORTER's Five Forces | Industry Analysis

Threat of New Entrants: Moderate

- Barriers: capital for secure infrastructure, licensing and compliance, trust, and scale.
- Incumbents gain from embedded finance and existing customers.

Buyer Power: High

- Low switching costs and easy comparisons across apps.
- Customers pressure pricing and expect rapid feature parity.

Competitive Rivalry: High

- Crowded digital-banking space (e.g., Wise, N26, Monzo).
- Competition focuses on price, user experience, and feature breadth.

Supplier Power: High

- Reliance on few cloud and network partners
- Oligopolistic suppliers with switching and integration frictions.

Threat of Substitutes: High

- Alternatives include traditional banks' apps, other neobanks,
- Users can switch or combine single-purpose apps if value declines.

2.3 SWOT | Internal Analysis

	Catalysts	Deterrents
Internal Factors	***Strengths*** ➢ **Leading digital finance platform** with high transaction volumes. ➢ **Vertically-integrated ecosystem**, offering multicurrency, investing, insurance, and payments. ➢ Structural **cost advantage** from a branchless model and freemium pricing.	***Weaknesses*** ➢ **Service gaps**, including slow response times & limited phone support. ➢ **Regulatory complexity** that increases **compliance costs** and time-to-market. ➢ Ongoing **trust concerns** due to **consumer scepticism** and fraud.
external Factors	***Opportunities*** ➢ **Product expansion** into mortgages, budgeting, and rewards. ➢ **Advanced Analytics** (AI/ML/blockchain) for enhancing personalization and fraud prevention. ➢ Stronger **premium offerings** are driving more customers to **paid plans.**	***Threats*** ➢ Failure to secure **UK banking license** would limit UK growth and market expansion. ➢ Intense competition: Major Irish, UK, and EU banks are rapidly improving digital offerings. ➢ Poor cybersecurity and fraud exposure put **reputation at risk** and increase regulatory scrutiny.

Intervention

Revolut

3.1 Revolut's Generic Strategy | Focused Differentiation

Organizational Fit

- **Digital-only** operating model **lowers fixed costs** and enables **rapid scaling →**
- Competes for **seamless experience,** not price.
- **Savings** are **reinvested** in product and **engineering** to strengthen the user experience.

Decisions Reinforcing Strategy

- **Unified platform:** payments, FX, budgeting, investing delivers high convenience and raises switching costs.
- **Tiered freemium pricing:** broad access with premium monetization and perceived exclusivity.
- **Savings** are **reinvested** in product and **engineering** to strengthen seamless user experience.

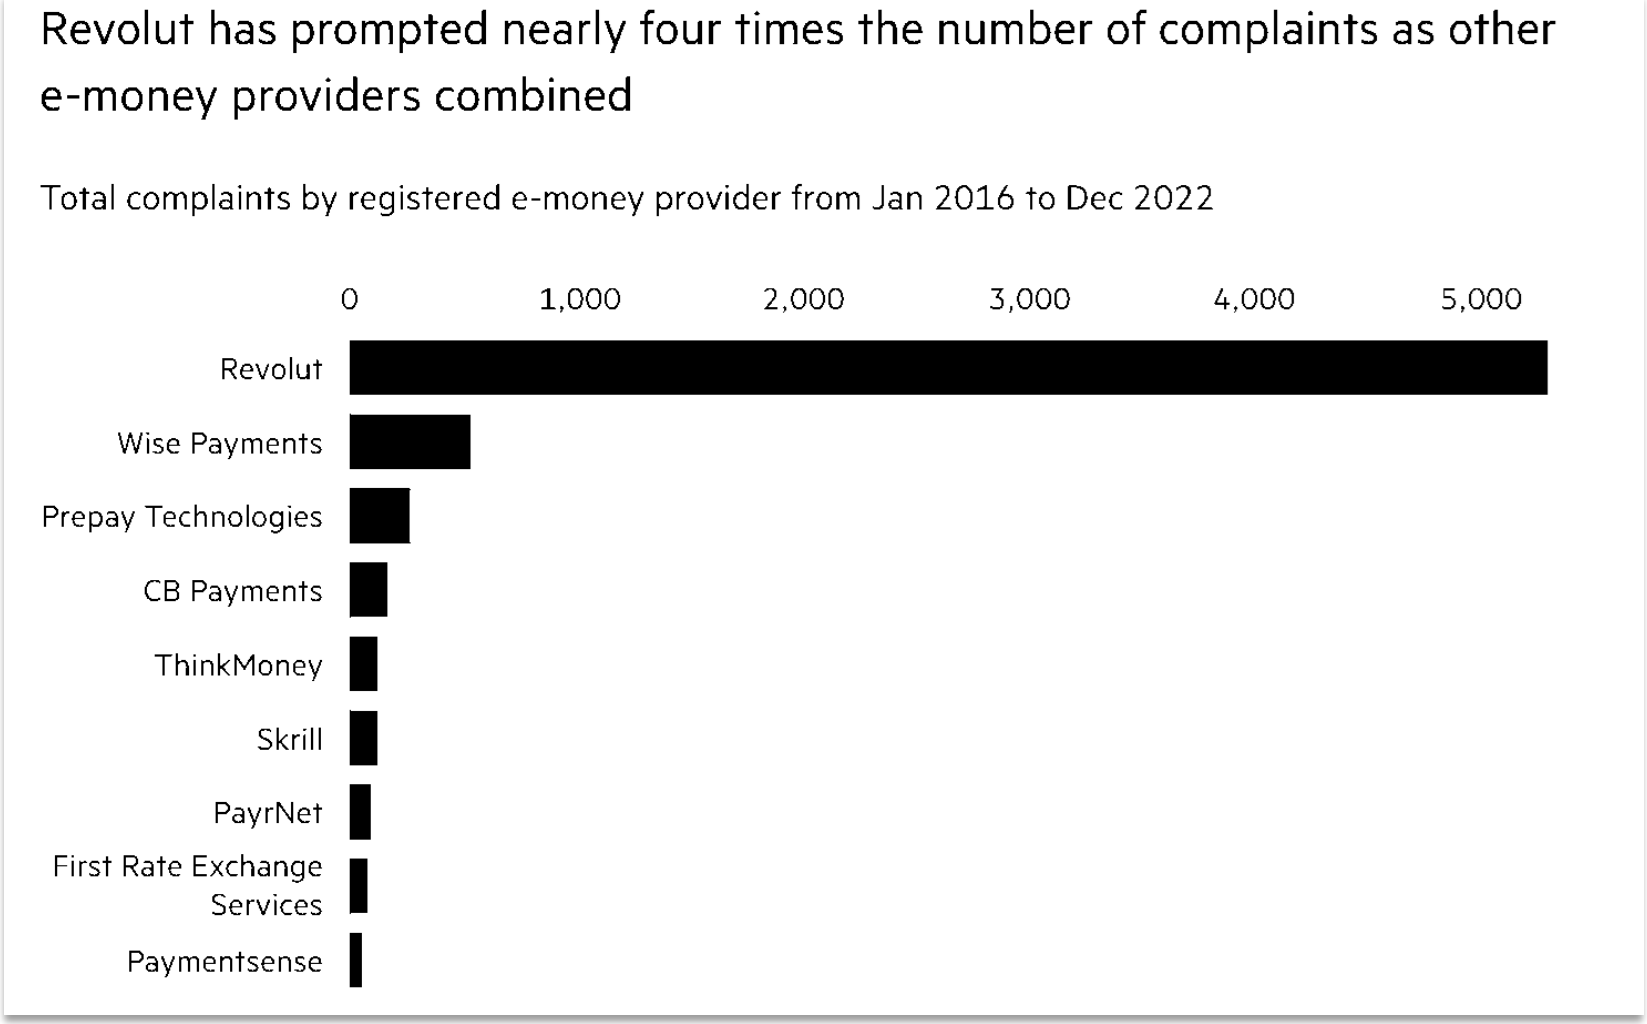
Evaluation & Recommendation

Revolut

Problem Identification



Source: Chart used is from Financial Times

Evaluation & Recommendation

Revolut

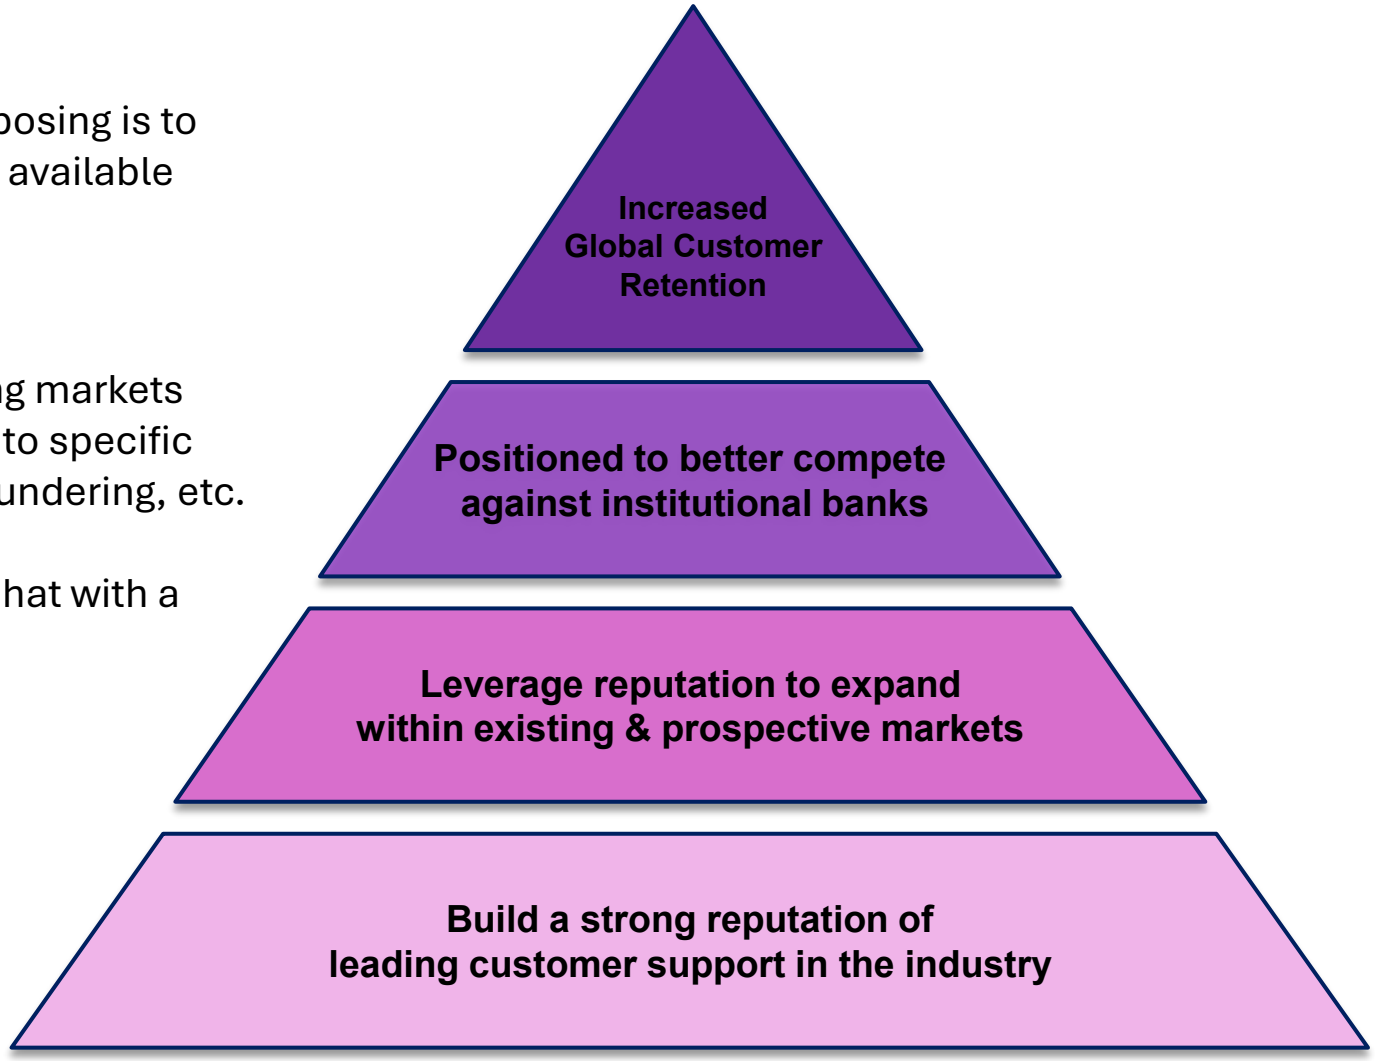
Recommendation

Suggested Strategy

- Given these issues, the suggested strategy our team is proposing is to improve the existing digital support channels by increasing available ***human*** customer support.

Plans For Achieving Proposed Strategy

- Ramp up hiring of customer service agents across operating markets
- Cross-train staff in the bank's service offerings, in addition to specific problem areas; i.e., frozen bank accounts, fraud, money laundering, etc.
  - Leads to creation of specialized, digital service hubs.
- Create virtual funnel for clients that would prefer to video chat with a representative.



KPI's for Measuring Success

- CSAT scores: Satisfaction ratings post call
- Complaints / 500 users
- FCR ratings: First Contact resolution
- TTR: Time to Resolution

Implementation

Revolut

Gantt Chart ~ 5 Year Timeline

Phase	Activity	Year 1 (6 mo. – 12 mo.)	Year 2 (18 mo. – 24 mo.)	Year 3 (30 mo. – 36 mo.)	Year 4 (42 mo. – 48 mo.)	Year 5 (54 mo. – Leader in customer satisfaction)
Short Term Phase	Commence talent acquisition of customer support staff					
	Begin specialized training in specific support functions, in additon to cross-training in banking services					
	Roll-out of KPIs to track employee performance					
Medium Term Phase	Digital support hubs of dedicated experts in pain-point areas are established					
	At this stage, AI chatbots should only be used for FAQs or resolving simple queries					
	Improve existing access to virtual support through a digital funnel that directs customers to video calls with agents					
Long Term Phase	Market new support systems to new & prospective customers					
	All complex cases are now dealt with by humans, not AI					
	Systematic, periodic evalutions of customer feedback to track efficacy of agents
